EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Schnoover on June 10, 2005 at 3:00 p.m.

The application has been amended as follows:

- a. In line 2 of claim 1, between the words "that" and "adapted", please insert the word -- is -- .
- b. On page 2, line 1 of claim 1, please remove the phrase "said LED signal generator and to".
- c. In claim 2, section f, line 2, please remove the phrase "said LED signal generator and to".

Reasons For Allowance

2. **Claims 1-2** are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor otherwise suggest a radiator cap comprising a water level readout window, LED signal generator, resetting means, an audible alarm and speaker mounted on the radiator cap, and an electrical circuit that includes a level sensing circuit for sensing the level of fluid in a radiator. Further the prior art fails to show a radiator cap that activates the water level readout window, LED

signal generator, and the audible alarm when the fluid level in a radiator reaches pre-set levels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Though not used to make a rejection, the cited references all show radiator caps or closures that were known in the art at the time of the invention by the applicant.
